THEORY IS AN EMPTY POCKET

All right if it holds when filled. Insurance is the theory, the pocket, the full of it. There is nothing like insurance, except more of the same kind. 57th year, doing business in 42 states.

The National Life Insurance Company of Vermont (mutual). Organized in 1850. S. S. Ballard, General Agent. N. B. Ballard, Local Agent. Rooms 2 and 3. Miles Block, Barre, Vt.

TALK OF THE TOWN.

Oyster steaks at the Eureka restaurant.

Don't forget to call at Mrs. Watt's, 3 Currier building, for that new spring hat.

Old gold and silver wanted at refiners, prices in exchange for goods at F. E. Burr's.

A lot of new and second hand golf clubs for sale at cost. Thomas C. Peters, 36 Pearl street.

Hay for sale, delivered in bulk. In quins of C. W. Perry, Gordon block. Telephone 110-13.

For Sale.—One baby carriage; one oil stove, almost new. Apply at 94 Summer street, upstairs.

Old Glory tops given away at the People's Shoe store with every purchase of a dollar or more.

Granite Polishers Branch of the G. C. I. A. will hold their regular meeting Thursday evening at 7.30 in Carpenters' hall.

Mrs. J. W. Moorcroft is still in town with pattern hats. Call and see them. Orders taken. 21 Church street. At C. E. Carr's.

A suite of two rooms, front, in the Miles granite building will be vacated April 15 and will be for rent. Enquire of D. M. Miles.

Household goods at private sale, including white iron bedsteads, chairs, etc. Mrs. N. A. Melver, corner of Franklin and Tremont streets.

The Union Co-operative Store has bought out Charles Zanleoni's bottling works machinery and are prepared to fill all orders for soft drinks.

Don't forget the illustrated lecture at the Congregational church Friday evening. Subject: "The Pilgrim Fathers," illustrated by 90 colored slides.

A good time to stop paying rent is when you can buy a god home, well located, on easy monthly payments. Read Perry's Real Estate ads in For Sale column.

After the 20th of this month the tax collectors for Barre will not ask for uncollected taxes, but will take all persons who have not then paid, according to the provisions of the Vermont statutes.

All persons or corporations liable to taxation in this city who claim an offset to be returned to other towns must return inventories to the assessors at once. All persons liable for poll tax only, who have not yet signed an inventory should do so at once and thus save themselves and the listers inconvenience. Assessors.

A Lucky Postmistress

is Mrs. Alexander of Cary, Me., who has found Dr. King's New Life Pills to be the best remedy she ever tried for keeping the stomach, liver and bowels in perfect order. You'll agree with her if you try these painless purifiers that infuse new life. Guaranteed by the Red Cross Pharmacy. Price 25c.

To Rent Until Paid For.

Our annual sale of second-hand organs is now in progress. These organs have been thoroughly overhauled and are in first-class condition, and each is warranted for five years. We have the Crown, Taber, Estey, Carpenter, Packard, Smith-American, Shoninger, and several other makes, at prices ranging from \$15 to \$200. Terms are \$2 down and \$2 per month. Stool and book with each organ. Write at once for full description and prices. McKannon Bros. & Co., No. 45 Church street, Burlington, Vt.

Notice.

Willard G. Smith, who during an absence of 30 years from this, his native place, has repaired and adjusted sewing machines of all kinds in factories, for all branches of manufacturing in central New York, and over 100 machines in Burlington, Vt., since his return, will repair machines at your homes, in Barre and vicinity, making an old machine run like a new one—or no pay. Address or leave word at No. 30 Averill street.

GRANITEVILLE.

All members of Victor Lodge, I. O. O. F., M. U., are asked to bring cake to the hall Friday evening. Per order secretary.

EAST MONTPELIER.

A May Day hall will be given at village hall on Tuesday evening, May 1. Music by Gilbertson's orchestra, and the full bill will be \$1.50. The managers are C. M. Hamblin, Fred Townsend and Roy Silley.

A CUTTING BENCH.

Arrangement in Use in Colorado's Famous Spud Region.

The seed potato cutter-illustrated is a machine used in the Greeley district of Colorado. It is said to be on the whole satisfactory.

A wide bench is boxed in on both ends and one side. It is divided into two or three compartments, these being open in the front, which corresponds to the side boxed in. To each of these compartments is attached a sack on hooks, and along one side of the bench in the middle of each compartment.

SEED POTATO CUTTER.

partment and right over the opening of the sack is fixed, in an upright position, a shoemaker's or common steel table knife.

Potatoes to be cut for planting are shoveled into the compartments of the box, and in front of each compartment a man takes his position, being seated on a box or stool for comfort's sake. He seizes the tubers in rapid succession and by pulling them against the blade quickly cuts one into as many pieces as desired. The pieces are then dropped into the open sack. It is claimed that by this indirect method of using the knife two fairly good cutters can cut each day all the potatoes ordinarily required for the use of one planter.

GOWN GOSSIP.

Embroidered vests are very much worn with boleros.

Some of the new shoes have bows on the side instead of the front.

Plain shirt waists of heavy materials have a patch pocket on the left side.

All over lace in designs that can be separated are an inexpensive way to get medallions in quantity.

Fancy waistcoats are a great feature in spring garments, and they give an opening for much hand work.

Most materials are being embroidered, often in open hole work, the patterns outlined with a narrow gold braid.

Sailor shapes multiply. The latest sailor is of the very short brim variety and is fitted from the side or back.

Flower crowned sailors, with narrow straw brims, are seen—New York Globe.

Right as a Trivet.

"As right as a trivet" is a piece of household slang. The trivet was a rod placed across the fireplace for the purpose of suspending from it a pot over the fire. It was necessary that the trivet should be exactly horizontal or disaster to the pot and its contents would result.

FARM BREVITIES

When clover fields are infected with the root borer, allowing them to stand but two years will help to subjugate the pest in any locality.

Seed corn should be so well cared for that it will contain no ears that will not germinate, and seed testing should be employed as a demonstration of the fact that the seed has received proper attention rather than as a screen to separate the worthless from the poorly preserved seed.

Every farmer should have his seed corn testing patch, on which competing selections from his own fields and varieties secured elsewhere may be subjected to a careful field test under his own eye.

Potato scab can be largely prevented by submerging the seed for two hours or more in a formalin solution made by dissolving one pint of formaldehyde in thirty gallons of water.

Great inspiration is obtained from keeping a record, and nothing gives a dairyman more satisfaction than watching the improved returns from his herd.

The byproducts of cheesemaking and buttermaking are valuable factors in adding to the wealth of dairymen through hogs and the rearing of cattle.

A TRANSPLANTER.

Homemade Device Utilizing the Ever Ready Tin Can.

East of the Mississippi river and north of Washington the tomato is handled as an annual, the seed being sown in hotbeds about the middle of March. The young plants as soon as they develop their first true leaves are transplanted to stand about two inches apart each way and are allowed to develop until they attain a height of four to six inches. They are then transplanted to pots three or four inches in diameter, similar to those used by florists, or, if these are not available, they may be shifted to strawberry boxes or to tin rims formed by melting the top and bottom from an ordinary two pound can used by canners in tinning vegetables.

The heat which is necessary to unsolder the top and bottom of these

AN AID IN TRANSPLANTING.

can will be sufficient to unsolder the seam at the side, which will leave a rim of about five inches in height and about three to three and a half or four inches in diameter. By tying a string around each rim it can be filled with soil and a young plant placed in the receptacle. By slipping a shingle under a can so prepared it may be shifted to the quarter where the plant is to grow until it attains the size desired for field planting.

A cut here reproduced from Professor Green's treatise on vegetable gardening shows a box of plants in tin cans ready for removal to the field and one can opened, showing the ball of roots. The cans are held together by wire twisted around them.

In the Country Schoolhouses.

Missouri is exploiting a fresh idea in agricultural training. According to correspondence of the St. Louis Globe-Democrat, E. E. Laughlin, president of the Missouri Corn Growers' association, says the sending of agricultural trains to county seats to hold farmers' institutes has been a failure, the farmers not attending. The plan of sending speakers to the school districts has been more successful. G. B. Ellis, secretary of the state board of agriculture, has sent G. W. Williams, the bee expert, out with an assistant into some of the southern counties, and as Mr. Williams sends in such a flattering report about the attendance and enthusiasm shown at the meetings Mr. Ellis has commissioned E. E. Laughlin, who will be assisted by H. J. Hyalap of Columbia, Mo., thoroughly to canvass Bates and Vernon counties during the next few weeks, after which other counties will be worked. The plan is to hold meetings in the schoolhouses in the evenings. Mr. Hyalap will give a talk and practical illustration on corn growing, and Mr. Laughlin will lecture on corn rotation.

Corn Planters. There is a general demand for well bred seed corn.

Every geographic section of the United States where soil or climatic conditions are distinctive needs one or more careful corn breeders.

Until the merits of a strain of corn and the honesty of the one who sells it are known farmers should purchase sparingly and insist on receiving the seed as ear corn.

The most important character corn can possess is the ability to produce large yields. This character can be greatly increased by persistent selection of good seed corn from the progeny of ears that have proved most productive.

Vitality is preserved by thoroughly and quickly drying the seed ears and storing them where they will not be exposed to damp atmosphere or sudden changes of temperature.—C. P. Hartley.

Important in Sugar Making.

In my experience the most important factor in sugar making is neatness. I store the sap in a galvanized tank out side the sugar house to keep it cool as possible and boil it as soon as possible. I used covers for part of my pails last year. Where I had covers when it rained I got full buckets of good sap. From those that did not have covers I had to throw away sap in a good sugar year I think the saving by using covers more than pays for them in one year. I use a felt strainer for straining the hot sirup. This takes out most of the malarie of lime, says a New England Homestead correspondent.

TO AILING WOMEN

A Little Sound Advice Will Help Many a Sufferer in Barre.

No woman can be healthy and well if the kidneys are sick. Poisons that pass off in the urine when the kidneys are well are retained in the body when the kidneys are sick. Kidneys and bladder get inflamed and swollen, crowding the delicate female organs nearby and sometimes displacing them. This is the true cause of many bearing-down pains, lameness, backache, sideache, etc. Urinary poisoning also causes headaches, dizzy spells, languor, nervousness and rheumatic pain.

When suffering so, try Doan's Kidney Pills, the remedy that cures sick kidneys. You will get better as the kidneys get better, and health will return when the kidneys are well. Let a Barre woman tell you about Doan's Kidney Pills.

Mrs. Eliza Mitchell of 42 Maple Ave., Barre, Vt., says: "For some time I was annoyed with kidney complaint. There was trouble with the kidney secretions which were irregular and too frequent, especially at night when my rest was greatly disturbed. I also had terrible pains just over my hips and these would sometimes extend up through my shoulders. I also had dizzy spells and every cold I caught made me suffer more acutely. My son had Doan's Kidney Pills with great benefit so I decided to try them. I got a box at E. A. Brown's drug store and had taken but a few doses when I experienced relief, and the use of two boxes improved my condition in every way. The pain in my back lessened, and the secretions were regulated."

For sale by all dealers. Price 50 cents. Foster-McLure Co., Buffalo, New York, sole agents for the United States. Remember the name—Doan's—and take no other.

Testing Seed Corn.

A test of seed corn can very easily be made by numbering the ears and then taking five or ten kernels from each ear and placing them in numbered rows in shallow boxes of moist sand, arranging them so that the kernels from ear No. 1 are in row No. 1, etc. The cut shows a portion of such

CORN TEST.

a box five days after the kernels had been placed in it—ten kernels from each ear to a row.

If the boxes used are two or two and a half inches deep and damp cloth is spread over the top after the kernels are placed in the sand, so further attention will be necessary for five or six days, when the results of the test can be recorded. The box should be kept in a warm place where the temperature does not fall lower than 50 degrees F.

French Farmers Like Oats.

The American does not usually associate the use of oats for labor with progressive farming, but in France they are to be found side by side with the latest and most highly improved labor saving machinery. When asked why he retains extra farm labor the French farmer invariably replies that they are more economical than horses. On an estate where very accurate accounts are kept of every detail the manager claims that four oxen do the same amount of work as three horses and that the cost of a day's work of a four ox team is \$2.80, while that of a three horse team is \$3.54. It is also said to cost much less to grow an ox to working age than it does a horse, and he can be sold as beef at any time. As little grain is possible to feed, and the rations are composed of the cheapest feeds obtainable.

Systems of Law in Germany.

No fewer than five systems of law are in use in Germany. In moving from one place to another tourists are often greatly puzzled when they find that an act perfectly allowable in one state is a crime in another. A still greater confusion often results when the right of property is considered.

Early Pallets.

In order to have a good, early maturing pullet it is necessary that she get a good start. The first few weeks' care is responsible to a great extent for her success or failure eight months later. Feed, regularity of feeding, cleanliness and plenty of grit and water are all important matters. Chicks should be carefully protected from storms and sudden changes of weather.
